ABOUT US

O NAS

ABOUT ISKRA

Iskra ranks among the leading Central European companies in the fields of energy, efficient installations, traffic, telecommunications, information technology and business solutions. We have long experience in developing and manufacturing devices, and wide engineering knowledge in realizing demanding projects in the fields of energy, industrial processes and information solutions. Our products and solutions are present in over 80 countries on all continents.

O ISKRI

Iskra je eno vodilnih vodilnih srednjeevropskih podjetij na področjih energetike, komponent s področja elektrotehnike, učinkovitih inštalacij, prometa, telekomunikacij, informatike ter varovanja, oskrbe in upravljanja poslovnih objektov. Imamo petinsedemdesetletne izkušnje pri razvoju in proizvodnji naprav ter bogato inženirske znanje pri realizaciji najzahtevnejših projektov na področjih energetike, telekomunikacij, prometa in industrijskih procesov. Naši kupci so multinacionalke z različnih področij, ki segajo od težke industrije, energetike, bele tehnike do obnovljivih virov. S svojimi izdelki, storitvami in rešitvami smo prisotni v več kot 80 državah na vseh kontinentih.

ABOUT ANTENNAS SYSTEMS

The programme of antenna systems originates from the former company "Iskra Antene" with a history that goes back to 1955, the year of the foundation of the company "Elektron". From the start, the programme has been involved in products for radio, T.V. & telecommunications. We supply a comprehensive range of products for the reception of analogue and digital terrestrial & mobile telecommunication signals.

O PROGRAMU ANTEN

Njena zgodovina sega v leto 1955, ko je bilo ustanovljeno podjetje Elektron. Že vse od ustanovitve se je podjetje ukvarjalo z izdelki za radio, TV in mobilne telekomunikacije. Danes podjetje ponuja zaokroženo paletu izdelkov za sprejem analognih in digitalnih zemeljskih signalov in signalov za digitalna omrežja.

ANTENNA SYSTEMS

ANTENSKI SISTEMI

All ISKRA antennas are optimized for best signals reception in the frequency band for which they are intended. A major feature of the antennas we produce is that they all have a built-in type »F« female connector for simple installation of the coaxial cable to the antenna.

Antennas are constructed with aluminium alloy type EN AW 3005 (AlMn1Mg0, 5) H165, which has high mechanical strength and resistance to the most adverse weather & temperature variations throughout the world.

Other metal parts are made from hot galvanized steel that is corrosion resistant. Plastic components are UV resistant. That ensures quality and longevity of the product.

Antennas are individually packaged into PVC bags, some having a cardboard header with technical instructions for in store placement & visual product promotion.

We can also supply antennas which are packaged in the individual printed or plain cardboard boxes. Transport cardboard boxes are always unprinted, in brown colour. It's made from a stronger cardboard to sufficiently protect the antenna in transit from our warehouse to the customer. Transport cardboard box typically contains 5 or 10 antennas, depending on the product type and size.

Vse ISKRA antene so optimizirane za najboljši sprejem signalov na frekvenčnem pasu za katerega so narejene. Večji del anten ima vgrajen »F« ženski konektor za lažjo montažo koaksialnega kabla na anteno.

Antene so izdelane iz aluminijeve zlitine EN AW 3005 (AlMn1Mg0,5) H165, ki ima visoko mehansko čvrstost tudi v najbolj neugodnih vremenskih pogojih.

Ostali kovinski deli antene so iz vročega cinkanega jekla, ki je korozionsko odporen, plastične komponente pa so izdelane iz plastike, ki je UV obstojna. Njene lastnosti so v vseh vremenskih pogojih nespremenljive.

Antene so posamično pakirane v PVC vrečkah, nekatere imajo priloženo obešanko za lažje obešanje antene na obešalo v trgovini. Nekatere antene se pakirane v nepotiskano ali potiskano posamično embalažo. Skupinska transportna embalaža je vedno nepotiskana, rjava barva. Izdelana iz močnejšega kartona, ki anteno dovolj zaščiti na poti od našega skladišča do kupca. V skupinski transportni embalaži je običajno 5 ali 10 anten.

DESCRIPTION OF DIFFERENT VERSIONS OF LOG ANTENNAS

OPIS RAZLIČNIH IZVEDB LOG ANTEN

① Antenna carriers / Nosilca antene
aluminium tube / aluminij cev
14x14x0.7 EN AW 3005 (AlMn1Mg0.5) H165

② Iron parts / Kovinski deli
hot galvanized steel / vroče cinkano jeklo

③ Fixing to mast / Pritrditev antene na drog
"U" screw M6 / "U" vijak M6

④ Directors / Direktorji
aluminium rod / aluminij palica
diameter / premer = 4 mm

⑤ Plastics / Plastika
ABS UV resistant / ABS UV obstojna

STANDARD VERSION FOR MOUNTING ON MAST

STANDARDNA IZVEDBA ZA MONTAŽO NA DROG

The standard version allow mounting the antenna on the mast only in horizontal position (for horizontal polarisation) and without inclination. Antenna can be mounted in vertical position (for vertical polarisation) with mounting accessories **D2-V** (see page 46).

Mounting on mast with outside mast diameter D = 20 ... 54 mm
Eg.: **P-2845 F**

Standardna izvedba omogoča montažo antene na drog le v horizontalnem položaju (za horizontalno polarizacijo) in brez inklinacije. Anteno lahko montirate na drog v vertikalnem položaju (za vertikalno polarizacijo) z uporabo dodatnega pribora **D2-V** (glejte stran 46).

Montaža na drog z zunanjim premerom D = 20 ... 54 mm
Npr. **P-2845 F**

H/V VERSION FOR MOUNTING ON MAST

H/V IZVEDBA ZA MONTAŽO NA DROG

The H/V version allow mounting antenna on the mast in horizontal position (for horizontal polarisation) or in vertical position (for vertical polarisation) without additional mounting accessories and without inclination.

Mounting on mast with outside mast diameter D = 20 ... 57 mm
Eg.: **P-2845 F H/V**

H/V izvedba omogoča montažo antene na drog v horizontalnem položaju (za horizontalno polarizacijo) ali v vertikalnem položaju (za vertikalno polarizacijo) brez dodatnega pribora in brez inklinacije.
Montaža na drog z zunanjim premerom D = 20 ... 57 mm
Npr. **P-2845 F H/V**

LOG ANTENNAS

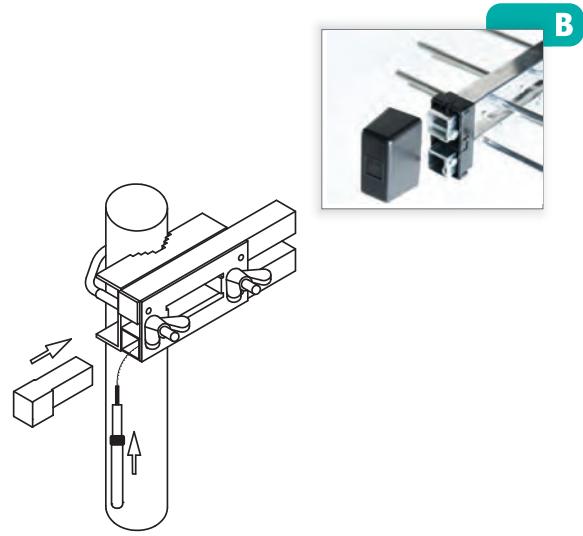

LOG ANTENE

VERSION - WITHOUT "F" FEMALE CONNECTOR IZVEDBA - BREZ "F" ŽENSKEGA KONEKTORJA

The cable must be inserted into the bottom antenna carrier. Coaxial cable is connected to antenna mechanically by screws.

Eg: **P-2845**

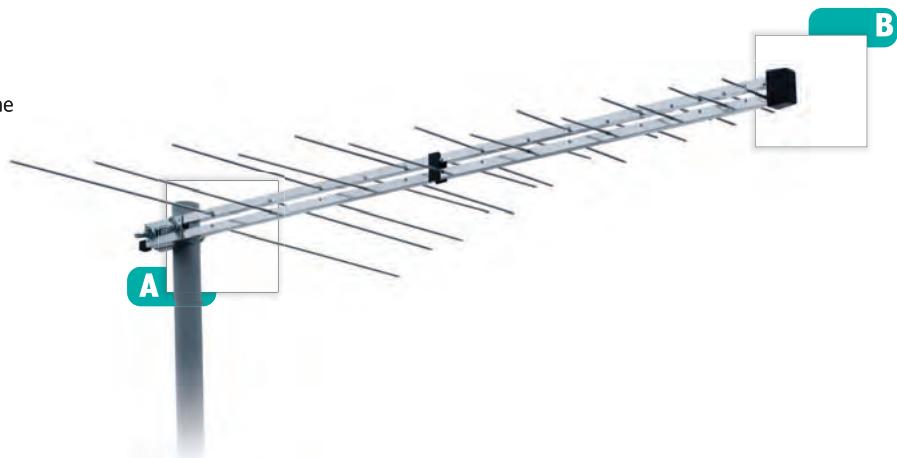

Kabel je potreben vstaviti v spodnji nosilec antene. Priklop kabla je mehanski, s pomočjo vijakov.
Npr. **P-2845**

VERSION - WITH BUILT-IN "F" FEMALE CONNECTOR IZVEDBA - Z VGRAJENIM "F" ŽENSKIM KONEKTORJEM

The antenna has a built-in "F" female connector. Coax. cable with "F" male connector must be connected to the antenna and protected by rubber protector (antenna already includes connector and rubber protector).

Antena ima vgrajen "F" ženski konektor. Kabel se s pomočjo "F" moškega konektorja priključi na anteno in zaščiti s protektorjem (konektor in protektor sta priložena).

LOG ANTENNAS

LOG ANTENE

VERSION - WITH FIXES "F" FEMALE CONNECTOR IZVEDBA - S FIKNIM "F" ŽENSKIM KONEKTORJEM

Passive antenna without amplifier.

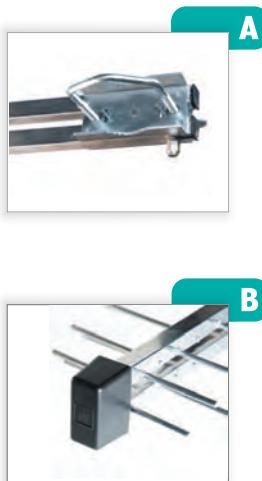

Pasivna antena brez ojačevalnika.

Passive antena can have following built-in inside the antenna carrier:

- only F female connector Eg.: **P-20 F**
- F female connector with LTE cut filter (see page 19)
 - LTE 800 LIGHT filter Eg.: **P-20 FLT**
 - LTE 700/800 LIGHT filter Eg.: **P-20 FLT7**

Pasivna antena ima v nosilcu antene vgrajen:

- samo F ženski konektor Npr.: **P-20 F**
- F ženski konektor z LTE sesalnim filtrom (glej stran 19)
 - LTE 800 LIGHT filter Npr.: **P-20 FLT**
 - LTE 700/800 LIGHT filter Npr.: **P-20 FLT7**

VERSION WITH ROTATING "F" FEMALE CONNECTOR IZVEDBA - Z VRTLJIVIM "F" ŽENSKIM KONEKTORJEM

If this version it is possible to turn "F" connector for 90° very easy. With this version it is suitable to use antenna in vertical polarization. It is used only for passive antennas without built-in LTE filters or antenna amplifier.

Eg.: **P-2845 FZ**

V tej izvedbi je mogoče zavrteti "F" konektorja za 90°. Ta izvedba je še posebej primerna za uporabo antene tudi v vertikalni polarizaciji. Uporablja se le pri pasivnih antenah brez vgrajenega LTE filtra ali antenskega ojačevalnika.

Npr.: **P-2845 FZ**

Active antenna with amplifier.

Aktivna antena z ojačevalnikom.

Active antena can have built-in following amplifiers inside the antenna carrier:

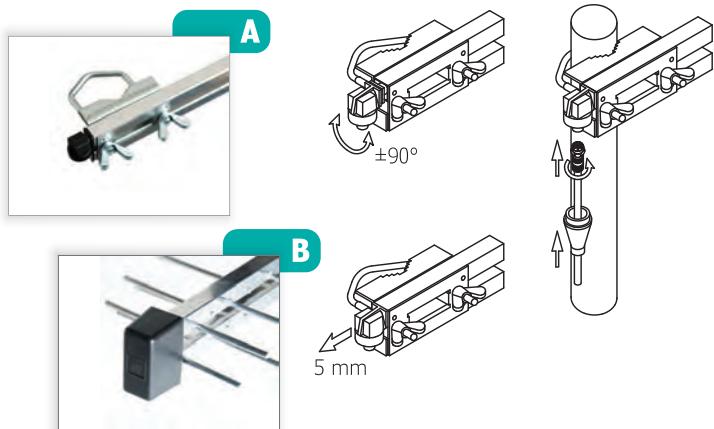

- low noise amplifier **DIGI-LOG 14VU** (see page 17) Eg.: **P-2845 DTT/G**
- low noise amplifier **DIGI-LOG 15R-U** (with SWITCH system) (see page 17) Eg.: **P-2845 G-SWITCH**
- low noise amplifier **DIGI-LOG 15RU L7** (with SWITCH system and LTE cut filter LTE 700/800 LIGHT) (see page 17) Eg.: **P-2845 G-SWITCH L7**
- low noise amplifier **DIGI-LOG 14VU L8** (with LTE cut filter LTE 800 LIGHT) (see page 17) Eg.: **P-2845 GLT**

Suitable power supply unit with output DC 12 V, 150 mA (see page 45).

Aktivna antena ima lahko v nosilcu antene vgrajena sledeča ojačevalnike:

- nizkošumni ojačevalnik **DIGI-LOG 14VU** (glejte stran 17) Npr.: **P-2845 DTT/G**
- nizkošumni ojačevalnik **DIGI-LOG 15R-U** (s SWITCH sistemom) (glejte stran 17) Npr.: **P-2845 G-SWITCH**
- nizkošumni ojačevalnik **DIGI-LOG 15RU L7** (s SWITCH sistemom in LTE sesalnim filtrom LTE 700/800 LIGHT) (glejte stran 17) Npr.: **P-2845 G-SWITCH L7**
- nizkošumni ojačevalnik **DIGI-LOG 14VU L8** (z vgrajenim LTE sesalnim filtrom LTE 800 LIGHT) (glejte stran 17) Npr.: **P-2845 GLT**
- nizkošumni ojačevalnik **DIGI-LOG 14VU L7** (z vgrajenim LTE sesalnim filtrom LTE 700/800 LIGHT) (glejte stran 17) Npr.: **P-2845 GLT7**

Primeren napajalnik je z izhodom enosm. 12V, 150 mA (glejte stran 45).

BUILT-IN ANTENNAS AMPLIFIERS FOR LOG ANTENNAS

VGRAJENI ANTENSKI OJAČEVALNIK ZA LOG ANTENE

Low-noise antenna amplifier serie DIGI-LOG is built-in inside aluminium antenna carrier 14x14 mm. It is used only for LOG antennas. Amplifier can be supplied from outside power supply* or directly from DVB-T receiver. Power supply is provided through the same coax. cable as reception signal.

Nizkošumni antenski ojačevalnik serije DIGI-LOG je vgrajen v notranjosti aluminijastega nosilca 14x14 mm. Uporablja se le pri LOG antenah. Napaja se iz zunanjega napajalnika* ali direktno iz digitalnega zemeljskega sprejemnika. Napajanje poteka preko istega koaks. kabla kot je prenos signala iz antene k TV.

DIGI-LOG 15R-U

DIGI-LOG 15RU L7

HOW SYSTEM "SWITCH" WORKS KAKO DELUJE SISTEM "SWITCH"

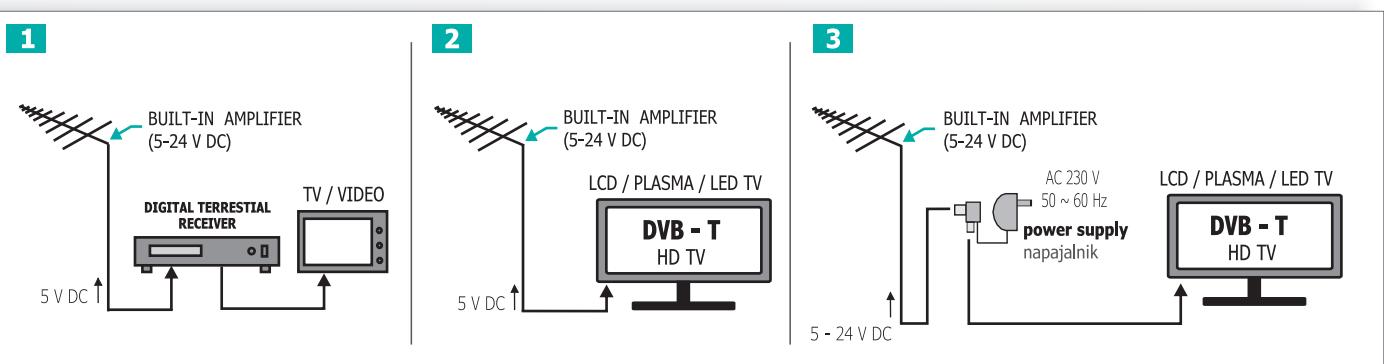

Example: Antenna P-20 G-SWITCH

1. LOW UHF signal: Switch ON power supply (5-24 V DC)
Gain = Antena + amplifier = 22.5 dB(i)
2. Strong UHF signal: Switch OFF power supply (don't need it)
Gain = Gain of antenna = 7.5 dB(i)

Primer: Antena P-20 G-SWITCH

1. Šibak UHF signal: Vklopimo (ON) napajanje (enosm. 5-24 V DC)
Ojačanje = Antena + ojačevalnik = 22,5 dB(i)
2. Močan UHF signal: Izklopimo (OFF) napajanje (napajanja ne potrebujemo)
Ojačanje = dobitek antene = 7,5 dB(i)

EXAMPLES OF CONNECTION PRIMER PRIKLJUČITVE

LTE FILTERS FOR LOG ANTENNAS

LTE FILTRI ZA LOG ANTENE

LTE filters are built-in inside antenna's aluminium carrier (in log-periodic antennas). We have several different LTE CUT filters:

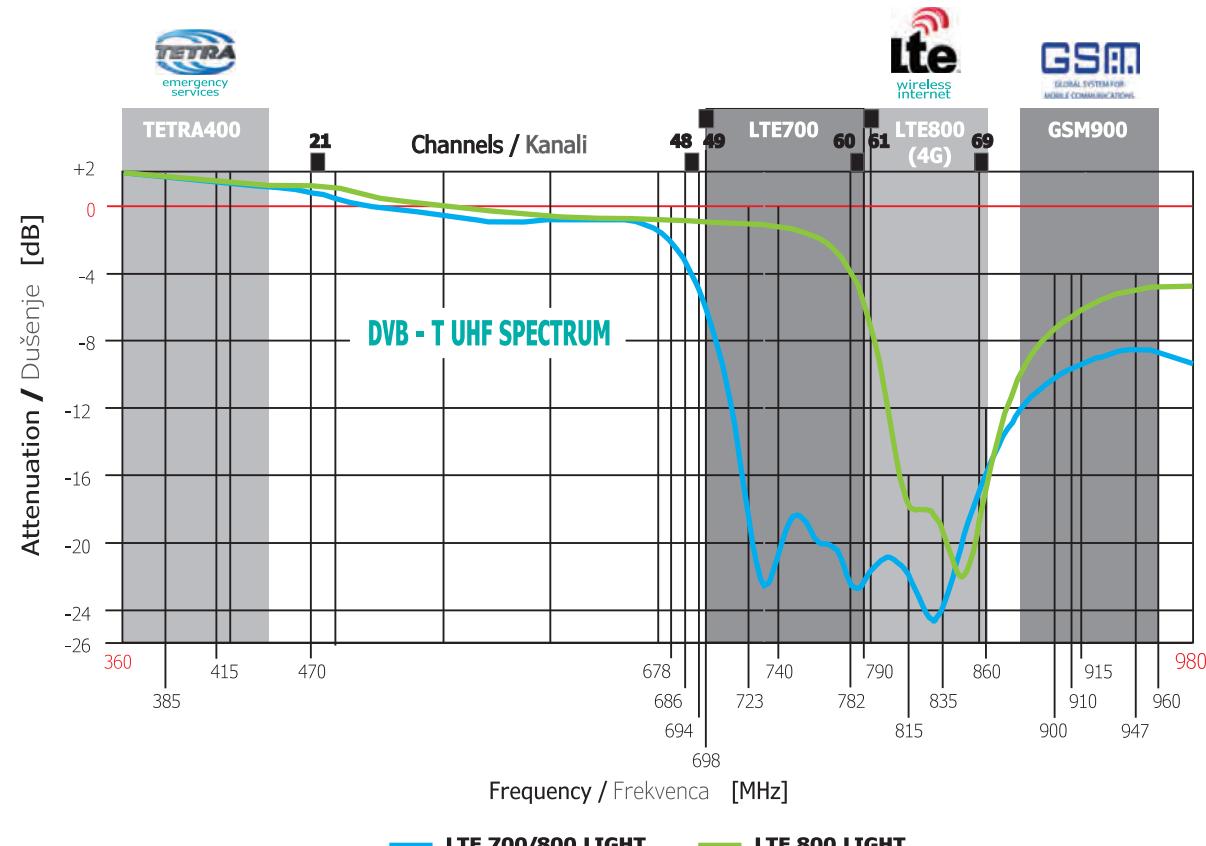

- **LTE 800 LIGHT** - Filter passes all frequencies from 0 to 790 MHz and primary cuts signals above 790 MHz.
- **LTE 700/800 LIGHT** - Filter passes all frequencies from 0 to 697 MHz and primary cuts signals above 697 MHz.

LTE filtri so vgrajeni v nosilec antene. Imamo več tipov LTE sesalnih filtrov:

- **LTE 800 LIGHT** - Spustijo vse frekvence 0 - 790 MHz in primarno zadržajo signale nad 790 MHz.
- **LTE 700/800 LIGHT** - Spustijo vse frekvence 0 - 697 MHz in primarno zadržajo signale nad 697 MHz.

TECHNICAL DATA / TEHNIČNI PODATKI		
Type Tip	LTE 800 LIGHT	LTE 700/800 LIGHT
Function Funkcija	Attenuating LTE 800 signals / Dušenje LTE 800 signalov	Attenuating LTE 700 + LTE 800 signals / Dušenje LTE 700 + LTE 800 signalov
Cutting frequencies Dušenje frekvenc	791 - 862 MHz: - 20 dB	698 - 862 MHz: - 22 dB
Loss on channels Slabljeno na kanalih	- 3.5 dB @ Ch.59 - 6.2 dB @ Ch.60	- 2.3 dB @ Ch.48 - 4.5 dB @ Ch.49
Pass freq. range - internal loss Izguba na prep. pasu	0 - 790 MHz: <0.7 dB	0 - 697 MHz: <0.9 dB

REFLECTORS

REFLEKTORJI

All reflectors are already factory-assembled. Each antenna's reflector is adjusted to achieve the best possible characteristics for the antenna. Reflector's installation on the antenna carrier is quick and easy without additional tools.

Vsi reflektorji so že tovarniško sestavljeni. Za vsako anteno so prilagojeni, da ima antena čim boljše lastnosti. Montaža na nosilec antene je hitra in enostavna brez dodatnega orodja.

YAGI ANTENNAS

YAGI ANTENE

DIPOLE DIPOL

Dipole is the heart of antenna. Therefore, each dipole of ISKRA antenna is designed for the best signal reception on its frequency band. YAGI antennas have mechanically 3 different dipoles:

Classic dipole with direct connection of coax. cable

Classic dipole with "F" female connector can have following baluns inside:

- passive balun for channels 21 - 69
- active balun with built-in amplifier DIGI-YAGI 20VD (see page 29)

DTX dipole with "F" female connector can have following baluns inside:

- passive balun for channels 21-69
- passive balun with LTE 800 LIGHT filter (for channels 21-60) (see page 32)
- passive balun with LTE 700/800 LIGHT filter (for channels 21-48) (see page 32)
- active balun with built-in amplifier DIGI-YAGI 16U (see page 30)
- active balun with built-in amplifier DIGI-YAGI 18U (see page 30)
- active balun with built-in amplifier DIGI-YAGI 18U L8 (DIGI-YAGI 18U with LTE cut filter LTE 800 LIGHT) (see page 30)
- active balun with built-in amplifier DIGI-YAGI 18U L7 (DIGI-YAGI 18U with LTE cut filter LTE 700/800 LIGHT) (see page 30)

Dipol je srce antene, zato ima vsaka ISKRA antena dipol natančno prilagojen za najboljši sprejem signalov v svojem frekvenčnem pasu, YAGI antene imajo mehansko 3 različne dipole:

Klasični dipol z direktnim priklopom koaksialnega kabla

Klasični dipol z "F" ženskim konektorjem:

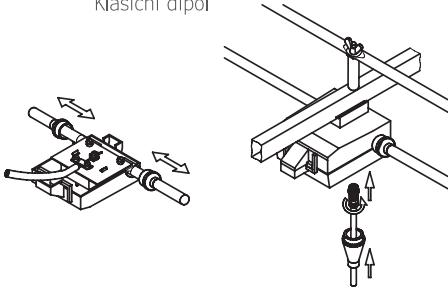

- pasivni sim. člen za kanale 21 - 69
- aktivni sim. člen z ojačevalnikom DIGI-YAGI 20VD (glejte stran 29)

DTX dipol z "F" ženskim konektorjem lahko vsebuje različne simetrične člene:

- pasivni sim. člen za kanale 21-69
- pasivni sim. člen z LTE 800 LIGHT sesalnim filtrom (za kanale 21-60) (glejte stran 32)
- pasivni sim. člen z LTE 700/800 LIGHT sesalnim filtrom (za kanale 21-48) (glejte stran 32)
- aktivni sim. člen z ojačevalnikom DIGI-YAGI 16U (glejte stran 30)
- aktivni sim. člen z ojačevalnikom DIGI-YAGI 18U (glejte stran 30)
- aktivni sim. člen z ojačevalnikom DIGI-YAGI 18U L8 (DIGI-YAGI 18U in LTE sesalnim filtrom LTE 800 LIGHT) (glejte stran 30)
- aktivni sim. člen z ojačevalnikom DIGI-YAGI 18U L7 (DIGI-YAGI 18U in LTE sesalnim filtrom LTE 700/800 LIGHT) (glejte stran 30)

DIRECTORS DIREKTORJI

Directors have different shapes, dimensions and are electrically specially designed for each antenna's type:

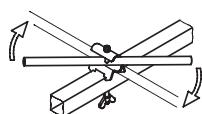

- **Channel and VHF antennas**
tubes dia. ϕ 10 mm, premounted, final mounting without any tools
- **DTX series antennas**
rods dia. ϕ 4 mm, final mounting without any tools
- **DTM series antennas**
tubes dia. ϕ 8 mm, fixed on antenna carrier, additional mounting is not necessary
- **TRIPLEX and UF series antennas**
rods dia. ϕ 4 mm, fixed on antenna carrier, additional mounting is not necessary

Direktorji so različnih izvedb, dimenzijsko in električno prilagojeni posameznemu tipu anten:

- **Kanalne in VHF antene**
cevke ϕ 10 mm, predmontirani, končno sestavljanje brez orodja
- Antene serije **DTX**
palice ϕ 4 mm, končno sestavljanje brez dodatnega orodja
- Antene serije **DTM**
cevke ϕ 8 mm, fiksne na nosilcu, dodatna montaža ni potrebna
- Antene **TRIPLEX in UF**
palice ϕ 4 mm, fiksne na nosilcu, dodatna montaža ni potrebna

ANTENNA AMPLIFIERS FOR YAGI ANTENNAS

ANTENSKI OJAČEVALNIKI ZA YAGI ANTENE

Low noise antenna amplifier DIGI YAGI 20VD is made as single active balun. It is used only for YAGI antenna with classic dipole on RADIO DAB+ antennas (page 7) or YAGI VHF antennas (page 22). It can be used for upgrading existing antenna too. Amplifier can be supplied from outside power supply* or directly from DVB-T receiver. Antenna is receiving signals only if balun is power supplied.

Antenna is receiving signals only if balun is power supplied. Power supply is provided through the same coax. cable as reception signal.

Nizkošumni antenski ojačevalnik DIGI YAGI 20VD je narejen kot samostojni aktivni simetrirni člen. Uporablja se le pri YAGI anteni s klasičnim dipolom, pri radijski DAB+ anteni (stran 7) ali YAGI-VHF anteni (stran 22). Uporablja se lahko tudi za naknadno vgradnjo v obstoječo anteno. Napaja se z zunanjim napajalnikom* ali direktno z digitalnim DVB-T sprejemnikom. Antena sprejema signale samo če je simetrirni člen napajan z električno energijo. Napajanje poteka preko istega koaks. kabla kot je prenos sprejetega signala.

DIAGRAM OF AMPLIFICATION / GRAF OJAČANJA

ANTENNA AMPLIFIERS FOR YAGI ANTENNAS

ANTENSKI OJAČEVALNIKI ZA YAGI ANTENE

Low noise antenna amplifier DIGI YAGI is made as single active balun. It is used only for YAGI antenna with DTX "F" dipole (all antennas in series DTX, DTM, TRIPLEX and some UF antennas). It can be used for upgrading existing antenna. Amplifier can be supplied from outside power supply* or directly from DVB-T receiver. Antenna is receiving signals only if balun is power supplied. Power supply is provided through the same coax. cable as reception signal.

Nizkošumni antenski ojačevalnik DIGI YAGI je narejen kot samostojni aktivni simetrični člen. Uporablja se le pri YAGI anteni, ki ima DTX "F" dipol (vse antene serije DTX, DTM, TRIPLEX in nekatere UF antene). Uporablja se za naknadno vgradnjo v obstoječo anteno. Napaja se z zunanjim napajalnikom* ali direktno z digitalnim sprejemnikom. Antena sprejema signale samo če je simetrični člen napajan z električno energijo. Napajanje poteka preko istega koaks. kabla kot je prenos sprejetega signala.

= 32 dB(i)

EXAMPLES OF USE / PRIMERI UPORABE

1st option / Prva opcija

Independent amplifier DIGI-YAGI

DTX "F" dipole's housing has to be opened and afterwards the existing passive balun has to be replaced by DIGI-YAGI amplifier. Tools are required for this intervention.

Samostojni ojačevalnik DIGI-YAGI

Plastično ohišje DTX "F" dipola je potrebno odpreti in zamenjati obstoječi pasivni simetrični člen z ojačevalnikom DIGI-YAGI. Za ta poseg je potrebno orodje.

2nd option / Druga opcija

Complete active DTX "F" dipole

Amplifier DIGI-YAGI is already installed inside DTX "F" dipole. It is necessary to replace the existing passive DTX "F" dipole with an active DTX "F" dipole. Tools aren't required.

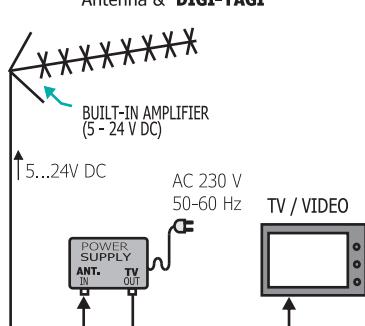

Kompletan aktivni DTX "F" dipol

Ojačevalnik DIGI-YAGI je že vgrajen v DTX "F" dipolu. Potrebno le zamenjati obstoječi pasivni DTX "F" dipol z tem aktivnim DTX "F" dipolom. Orodje ni potrebno.

3 Antenna & **DIGI-YAGI**

LTE FILTERS FOR YAGI ANTENNAS

LTE FILTRI ZA YAGI ANTENE

LTE filters are built-in into balun. We have several different LTE CUT filters:

- **LTE 800 LIGHT** - Filter passes all frequencies from 470 to 790 MHz and primary cuts signals above 790 MHz.
- **LTE 700/800 LIGHT** - Filter passes all frequencies from 470 to 697 MHz and primary cuts signals above 697 MHz.

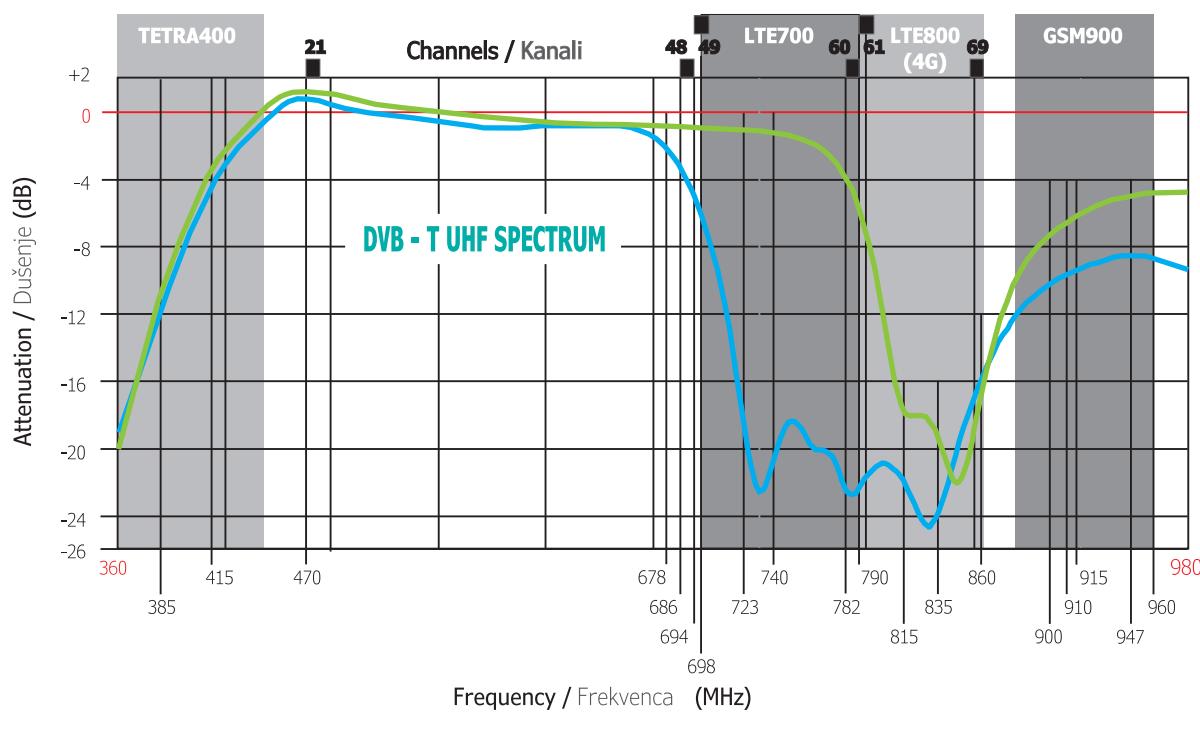

LTE filtri so vgrajeni v simetrični člen. Imamo več tipov LTE sesalnih filtrov:

- **LTE 800 LIGHT** - Spustijo vse frekvence 470 - 790 MHz in primarno zadržijo signale nad 790 MHz.
- **LTE 700/800 LIGHT** - Spustijo vse frekvence 470 - 697 MHz in primarno zadržijo signale nad 697 MHz.

 Anteno G-2235-07 lahko priključimo na direktni izvir 12V enosmernega toka (avto, plovilo, karavan prikolica, itd.).

MOBILE NETWORK ANTENNAS

ANTENE ZA MOBILNA OMREŽJA

- ① Antenna carriers / Nosilca antene
Aluminium tube / aluminijasta cev
- ② Iron parts / Kovinski deli
hot galvanized steel / vroče cinkano jeklo
- ③ Fixing to mast / Pritrditev antene na drog
"U" screw M6, without inclination
"U" vijak M6, brez inklinacije
- ④ Directors / Direktorji
aluminium rods / palice iz aluminija
dia. ϕ 4 mm
- ⑤ Plastics / Plastika
ABS UV resistant / ABS UV obstojna
- ⑥ Coaxial cable with connector at the end of the cable /
Koaksialni kabel z konektorjem na koncu kabla

Mounting on mast / Pritrditev na drog

Standard coax. cable lenght is 10 m. It is possible to order antenna with different coax. cable lenght and different connector: SMA, FME, N ...

Standardna dolžina koaks. kabla je 10 m. Lahko naročite anteno z drugo dolžino koaks. kabla in konektorjem SMA, FME, N ...

Mobile network antenna is used primarily for the reception of 2G/3G/4G/5G mobile operator's signals in areas where mobile communication is impossible due to low signal level. The antenna is connected via connector directly on the mobile phone or on the card for wireless internet (e.g. 3G/4G USB modem or LTE Wi-Fi router). Additional adapter for connecting antenna to your 3G/4G modem is probably required.

Some mobile network antennas are used for wireless LAN signal transmission. Brand new mobile network antennas cover the entire freq. range from LTE 700 to LTE 5G 3,8 GHz (698 to 3800 MHz).

Mobile network antenna has reliable and robust design for optimal performance and long life time expectancy. Antenna does not require additional assembling, because it's already assembled.

Impedance of all mobile network antennas is 50 Ohm. Maximum connecting power of all mobile network antenna antennas is 50 Watt.

The gain of the antenna is measured without taking cable losses into account

Antena za mobilna omrežja se uporablja predvsem za sprejem 2G/3G/4G/5G signala mobilnih operaterjev na področjih, kjer je uporaba mobilnega aparata nemogoča zaradi prenizkega nivoja signala. Antena se priklopí preko vgrajenega konektorja direktno na mobilni aparat ali na kartico za brezžični internet (npr. 3G/4G USB modem ali na LTE Wi-Fi usmerjevalnik). Za priklop antene na modem boste verjetno potrebovali še dodatni adapter.

Nekatere antene za mobilna omrežja se uporabljajo tudi za prenos brezžičnega LAN signala. Najnovejše antene za mobilna omrežja pokrivajo celoten frekvenčni pas od LTE 700 do LTE 5G 3,8 GHz (od 698 do 3800 MHz).

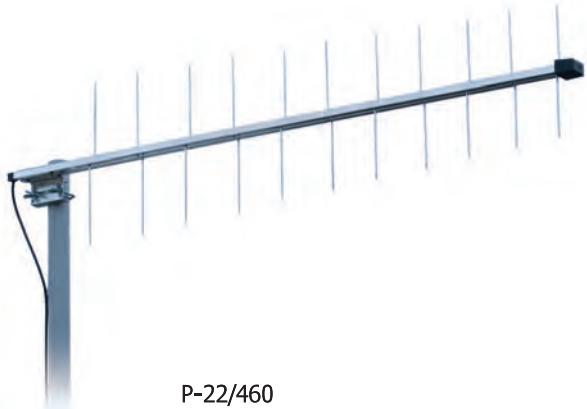

Antena za mobilna omrežja ima zanesljiv in robusten dizajn za optimalno delovanje in dolgo življenjsko dobo. Antene ni potrebno sestavljati pred montažo na drog, saj so vsi sprejemni deli že mehansko sestavljeni.

Impedanca vseh anten za mobilna omrežja je 50 Ohm. Največja priključna moč vseh anten za mobilna omrežja je 50 W.

Dobitek antene je pomerjen brez upoštevanje izgub kabla.

Gain diagram for each antenna is the same as for standard UNICOM/LTE/5G antenna (see previous pages on this catalogue). /
Graf dobitka za vsako anteno je enak kot za standardno UNICOM/LTE/5G anteno (glejte predhodne strani v tem katalogu).

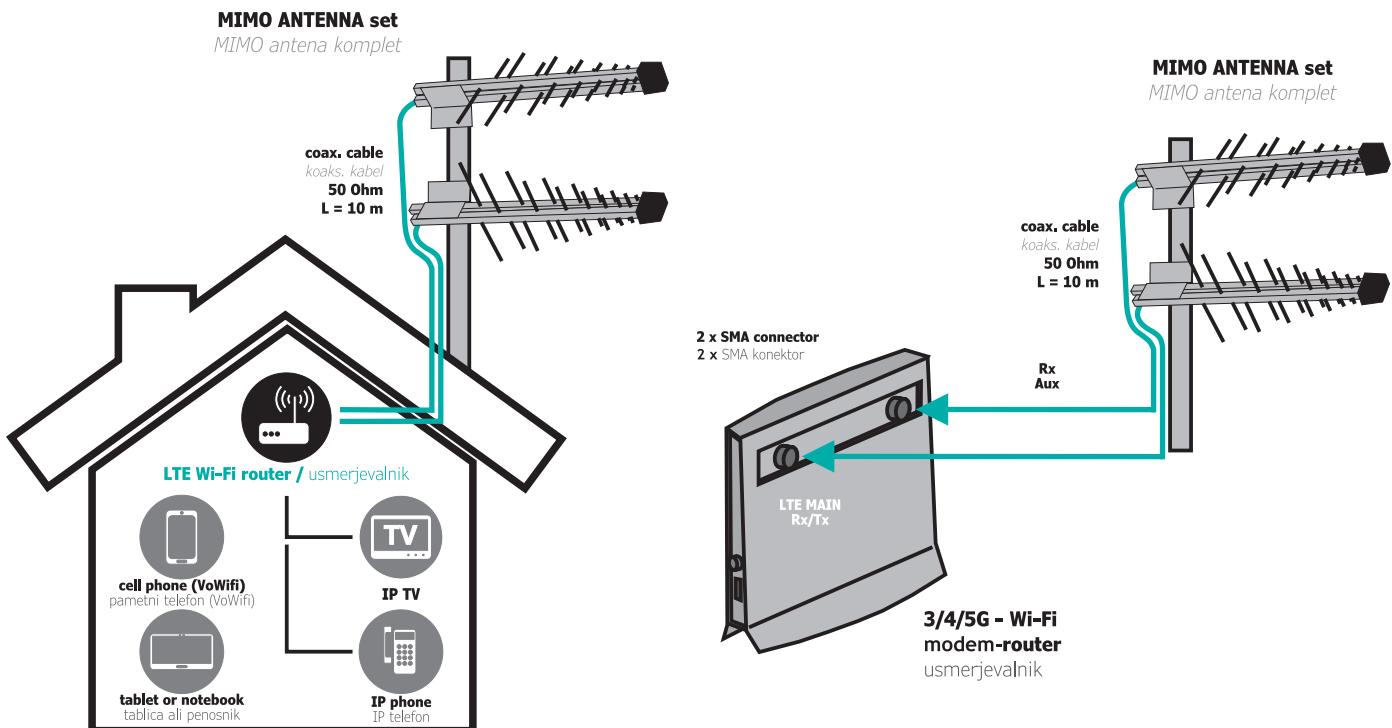

* One set contain two antennas, adapted for X-polarisation mounting (MIMO reception). Standard version of antenna includes 10 m high quality coax. cable ended by SMA male connector. /
En komplet vsebuje dve anteni, prilagojeni za montažo v X polarizaciji (MIMO sprejem). Standardna izvedba antene vsebuje 10 m visokokvalitetnega koaks. kabla v SMA moški konektor na koncu kabla.

ACCESSORIES

PRIBOR

Vertical mounting part **D2-V** is used as additional part for LOG antennas. LOG antennas can be used for vertical polarisation with **D2-V** part. It has to be mounted on LOG antenna with screws, washers and nuts (included).

Vertikalni pritrdilec D2-V se uporablja kot dodatni montažni element za LOG antene. Z njim lahko pritrdimo LOG anteno na drog za uporabo antene pri vertikalni polarizaciji. Vgradi se na LOG anteno z vijaki, podložkami in maticami (so priloženi)

We offer complete assortment of terrestrial and mobile network systems accessories.

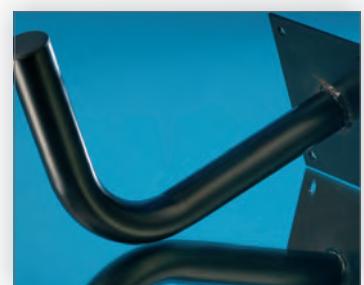

Nudimo vam tudi kompletan pribor za zemeljske antene in mobilna omrežja.
